Green Print **Not Opening** when you log onto a computer

If you log onto a computer and the “green print” service does not start please follow these instructions to get the program to load so that you will be able to print.

1. Click the Windows “Start” button

![Start Menu]

2. Click on “Computer”

![Computer Folder]
3. Double click to open “Bootcamp (C:)”

4. Double click on the item labelled “greenprint” to start the program

5. Once Greenprint has loaded you will then be able to print.
