Windows 7 Wireless setup for Wilkes.edu

Please follow these instructions for connecting to the Wilkes.edu wireless network with a Windows 7 computer.

1. Click the start button and select Control Panel from the menu.

Once in the control panel select

2. With the Network and Sharing center is open, select > Manage wireless networks from the menu on the top left side of the screen.

3. Select add

   Manage wireless networks that use (Wireless Network Connection)

   Windows tries to connect to these networks in the order listed below.

   Add   Adapter properties   Profile types   Network and Sharing Center

4. Then select Manually create a network profile

How do you want to add a network?

Manually create a network profile

This creates a new network profile or locates an existing network and saves a profile for the network on your computer. You need to know the network name (SSID) and security key (if applicable).
When entering **Network name** type in **Wilkes.edu** (insure you capitalize the W)
Then in the **Security type**, Select **802.1x**
Leave the check mark in the box for **Start this connection automatically**

5. **Click Next**

On the following screen select **Change connection settings**
6. Ensure there is a checkmark in the box for **Connect automatically when the network is in range**.

7. Then Select the **Security Tab**

8. On the Security tab select **Settings**
9. Remove checkmark for **Validate server certificate**, then click **Configure**

10. Make sure to remove the checkmark next to **Automatically use my Windows logon name and password** (and domain if any).

11. Click **Ok** on all three windows to close them and close out of the Network and Sharing center

12. **Open Internet explorer** and at the login screen use the same User/Pass you use for your email or the MyWilkes Portal
